What The Editor is Expected to Do.
The editor of a country newspaper has no business to make mistakes; has no business to ever get anything in his paper that people do not like. He ought to know just what would suit each individual, or he ought to take each item before it is published and let the person whom it concerns censor it. An editor has plenty of time to do all this, as all he has to do is to hunt news and clean rollers, set type, wash forms, clean the floor, pen short items, hustle for advertising, fold papers and write wrappers, talk to visitors, and distribute type, read proof and correct mistakes, dodge bills and dun the delinquents, and take cussings and tell the subscribers that he needs money. An editor has no business to make mistakes while attending to little trifles like these, and living on oxtail soup flavored with imagination, wearing old shoes and no collars, a patch on the equator of his trousers and at the same time turn a smiling countenance on the man who tells him that his paper isn't worth the subscription price, and that anyone could print a better paper with his eyes shut.

Four hundred and fifty-two thousand children (under twenty-one years old) were arrested in this country during one year's time, at an expense of over \$10,000,000. The average cost of every arrest made is \$20. It has cost \$500,000,000 to build the prisons of the United States, and maintenance costs between \$50,000,000 and \$75,000,000 per year.

The following statement of a Liverpool physician will be of some interest at this time, says an exchange: "I am willing to risk my reputation as a public man that the worst case of smallpox can be effectually cured in three days by cream of tartar. One ounce of cream of tartar dissolved in a pint of boiling water, to be drunk when cold, at short intervals. It can be taken at any time and is a preventative as well as a curative. It is known to have cured a hundred thousand cases. I, myself, have restored hundreds by this means. It never leaves a mark nor causes blindness and prevents tedious lingering.

Not Paying his Own Way.

President McKinley has left Washington for a tour of the country and will travel in a style of unparalleled elegance for the president of a democratic nation. His special train consists of six Pullman cars, including the Olympia, the most sumptuous railroad carriage in the world. During his journey Mr. McKinley and his party will traverse twenty-five states and will travel 15,000 miles.

While the president was anxious, it is stated, to defray all the expenses of the trip out of his own purse, it is said that the Pullman company and the railroads would not permit him to use any part of his hard-earned wages for this purpose. They will "pay the freight," and all they ask in return is that the president will be as happy as the presidential dignity will permit.—Ex.

The Editor and his Wife.

The editor and his wife disagree with each other very materially. She sets things to right, and he writes things to set. She reads what others write, and he writes what others read. She keeps the devil out of the house as much as possible, and he retains him and could not go to press without him. He knows more things than he writes and she writes more than she knows.

A Cup of Good Coffee

To get a really good cup of coffee you'll have to start back of the actual making; you'll have to look to the roasting and the grinding. In ARBUCKLES' you have a coffee that's scientifically roasted, and delivered to you with all the pores of the berry hermetically sealed. You're sure of a good cup of coffee because all the coffee flavor and aroma are kept intact until you want it. The fame of ARBUCKLES' induced other coffee packers to put out imitations of it. These imitations cost the grocer (and you) a cent a pound less than ARBUCKLES'. But don't be tempted to buy a package of some other coffee when you can get

Arbuckles' Roasted Coffee

for it is actually less expensive than the cheap kind; goes further—besides being better flavored, more satisfying.

You will find a list of useful articles in each package of Arbuckles' Coffee. A definite part of one of these articles becomes yours when you buy the coffee. The one you select from the list will be sent you on condition that you send to our Notion Department a certain number of signatures cut from the wrapper.

It has been said that the Pan-American
Exposition will be a Rainbow
City by day and City of Light by night,
and if this be true it should prove the
most beautiful sight of kind ever
created for the delectation of the bu-
reau vision.

Much has been written about the illumi-
nations of the Exposition, but the
public is scarcely aware of the magni-
tude of the scene which is to be
created by the use of incandescent
lights in such generous profusion about
the main court of the Exposition and
the buildings immediately surrounding it.
When one says that 300,000 of
these lights are to be used, the figures
look large, but they are nevertheless
true. Nor does this include all the
lights that are to be used in the general
illumination of the Exposition, for on
the Midway several concessions, such
as the Thompson Aerio Cycle, Streets
of Mexico and some others will use as
many as 2,000 lights each. In the
buildings and about the border of the
ground will be arc lights, while incan-
descent lamps will also be used by
many individual exhibitors. Thus the
figures 300,000 will be considerably in-
creased. The illumination of the Elec-
tric Tower is going to be not only as-
tonishing and novel, but truly artistic.

Automobile Exhibit.

The automobile has won such favor
that the construction of these vehicles
has become one of the important new
industries of the world. In any new
and prominent field like this the United
States, with its wealth of active in-
ventive minds, is expected to take the
lead. That this country does lead will
be demonstrated by the exhibit made
at the Pan-American Exposition.
